

**SPA START-UP REGULAR
300-500 GALLONS**

START UP

Remove the filter cartridge and begin filling the spa by inserting garden hose into the hole where cartridge sits. Add 3 capfuls of Stain & Scale Control while filling. Fill spa to water line or just above highest jet. Set temp control to 100-102 and let spa heat. Turn on jets to circulate. Wait 15 Minutes. Add 1 capful of Enhanced shock, if you are not using spa immediately. If you will be using, wait until afterwards and add 1 capful of Enhanced Shock.

MAINTENANCE

After each use:

Add 1 large or 3 small caps of
Bromine Concentrate (don't fill) or Chlorine Concentrate

WEEKLY

Every Sunday:

Test weekly with test strips – adjust PH & Alkalinity accordingly
Add 3 caps of Stain & Scale
Add 1 cap of Enhanced Shock

DO NOT MOVE DIVERTERS WHEN JETS ARE BLOWING AT FULL FORCE

BioGuard.
