

**SPA START-UP WITH SPA SENTRY
300-500 GALLONS**

START UP

Remove the filter cartridge and begin filling the spa by inserting garden hose into the hole where cartridge sits. Add 3 capfuls of Stain & Scale Control while filling. Fill spa to water line or just above highest jet. Set temp control to 100-102 and let spa heat. Then set temp control to 80 in order to kick heater off. Pour in full quart of Spa Sentry (no need to wait for water temp to lower). Turn on jets to circulate. Wait 15 Minutes. Add 1 capful of Enhanced shock, if you are not using spa immediately. If you will be using, wait until afterwards and add 1 capful of Enhanced Shock.

MAINTENANCE

After each use:
Add 1 large or 3 small caps of
Bromine Concentrate (don't fill) or Chlorine Concentrate

WEEKLY

Every Sunday:
Test weekly with test strips – adjust PH & Alkalinity accordingly
Add 3 caps of Stain & Scale
Add 1 cap of Enhanced Shock

DO NOT MOVE DIVERTERS WHEN JETS ARE BLOWING AT FULL FORCE

BioGuard.
